Mathematics Department Summer Assignment 2018

Instructions:

1. Create a Khan Academy account, if you don't already have one.
 - a. If you're signing up for the first time, select high school and your grade.
 - b. Then select 1 subject to continue. (It could be any subject)
2. Once you've logged on, select the "coaches" tab.
3. Copy your course code (see below) and enter it into "Join a class".
 - a. Do the same for both course codes. The course codes give both math teachers access to your profile
4. Once students have added the course code, the teacher will receive a notification that a student has been added to his class. The teachers will then add specific assignments to the module.
 - a. Students will not have to complete an entire course on Khan Academy during the summer.
 - b. The math teachers will be adding very specific assignments that the students will have the ability and time to complete during the summer, even if they are working or are in summer camp. They will not be overwhelmed with topics, but will rather be given 2 or 3 assignments to complete each week.
5. Please continuously check the assignments tab in your dashboard and complete the assignments given to you.

If you're going to be taking **Algebra 1** or **Geometry** in 2018 – 2019, add the following course codes:

- F3ERN783
- P38UT54D

If you're going to be taking **Algebra 2** in 2018 – 2019, add the following course codes:

- 2MUDJ7RK
- P38UT54D

If you're going to be taking **Intermediate Algebra, Pre – Calculus** or **Trigonometry** in 2018 – 2019, add the following course codes:

- QXNP3JXP
- P38UT54D

Excellence is no accident
